

Cyber Security and GDPR - Are you ready to act?

We've been delivering professional business critical software since 1999 - here's our top tips...

Cyber Security

- 1. Keep software up to date**
Ideally use automatic updates if available
- 2. Have a password policy - and use it**
Start with the NCSC guidance at www.ncsc.gov.uk
- 3. Train your team - share the message**
Everyone has their part to play
- 4. Recognise who you trust, and why**
Understand the policies of your third-party providers
- 5. Only install what you know you need**
And only use software from trusted sources

GDPR

- 1. Focus on ongoing operations**
Compliance is a process, not an event
- 2. Single customer view**
Easier compliance with joined-up systems
- 3. Self-service**
Allow your customers to control their own data
- 4. Know where your data is**
Spreadsheets, systems, the cloud?
- 5. Legal and tech teams must work together**
Help them to speak the same language
